Tejas Pandav

SOC Analyst | CEH Certified

India | +91-9021451291 | tejaspandav248@gmail.com | LinkedIn | GitHub | Portfolio WebSite

SUMMARY

CEH-certified SOC professional with 1.1 Year+ of hands-on experience in SIEM monitoring, alert triage, and incident response within a Security Operations Center (SOC). CEH-certified with strong expertise in log analysis, threat detection, and the MITRE ATT&CK; framework. Developed AI-driven cybersecurity solutions, including NLP-based phishing detection and automated alert prioritization (SOAR). Experienced in investigating phishing, brute-force, and malware incidents, improving detection accuracy and response efficiency.

EXPERIENCE

SOC Analyst (L1) | [Audix-Technologies] | [Sep 2025, Present]

- Monitored and analyzed security alerts using SIEM tools such as Seceon and Splunk.
- Performed alert triage, incident response, and incident management.
- Investigated phishing, malware, and unauthorized access incidents.
- Conducted log analysis across endpoints, servers, and network devices.
- Reduced false positives by improving detection rules.
- Mapped alerts to MITRE ATT&CK; framework, Escalate validate incidents to L2 and managed incident tickets in ITSM tools ensuring accurate details, SLA tracking, and timely updates.
- Prepared monthly reports and handled client queries (L1 support).

PROJECTS

Home SIEM Lab using Wazuh

Technologies: Wazuh, Sysmon, ELK Stack, Kali Linux, Windows 10, VirtualBox

- Built a SOC home lab environment using Wazuh SIEM for real-time monitoring and log analysis
- Configured Sysmon and Windows Event Logging for endpoint visibility and threat detection
- Simulated brute-force attacks and port scanning using Kali Linux
- Analyzed alerts through Wazuh dashboards and ELK visualization
- Mapped attack behavior using MITRE ATT&CK; framework

AI-Powered Phishing Detector

Technologies: Python, Scikit-learn, Pandas, NLP, Streamlit

- Developed AI-based phishing email detection using Machine Learning and NLP
- Implemented feature extraction including malicious URLs and sender patterns
- Automated phishing analysis workflow to support SOC alert triage

SKILLS

SIEM
Splunk, Microsoft Sentinel, IBM, QRadar, Wazuh, Seceon.

EDR & Tools
CrowdStrike, Microsoft Defender, SentinelOne, Wireshark, Snort, Metasploit, ClamAV, pfSense

Programming
Python, Bash, TypeScript, C, C++

Query Languages
SPL, KQL, Lucene.

Networking
TCP/IP, DNS, HTTP/HTTPS, Firewalls, VPNs, IDS/IPS

Systems & ITSM/ Ticketing
Windows, Linux, VMware, Jira, ServiceNow.

Cloud
AWS, Azure, IAM

CERTIFICATIONS – Click Here to see

- CEH – EC-Council
- Cyber Security – PrepInsta
- Ethical Hacking – PrepInsta
- Python – IIT Bombay
- Machine Learning – Internshala
- Seceon SIEM (Q4)

EDUCATION

Bachelor of Engineering (B.E.) in Information Technology Savitribai Phule Pune University (SPPU)
Zeal College of Engineering and Research, Pune
CGPA: 7.96
